

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our home privacy since we no longer receive phone calls that are a real nuisance. Indiana's law has been very effective since I signed up as I previously received 12-15 calls per week, and now I only receive one if any. Please do not allow the Indiana Telephone Privacy Law to lessen as I do not want those calls back. Thank you!
